Executive Summary

teachwithsol.com has unusually strong GEO foundations (llms.txt, markdown docs, FAQ/Org/SoftwareApplication schema, GPTBot allows). SEO is held back by sitewide Open Graph inheritance — docs/trust pages still advertise homepage title/description/url — plus a short ~88-char meta description and empty hero image alts. Urgent fix: page-unique title/description/OG on docs and trust hosts. Opportunity: question-led HowTo/Speakable blocks on existing FAQ and procedural docs.

Scores: SEO 6/10 (On Track) · GEO 8/10 (Strong) · AEO 7/10 (On Track) · Combined 21/30

Pages Audited

18 resources across www, docs, and trust (Privacy/Terms/DMCA skipped). Includes homepage, 11 docs guides, docs index, security, llms.txt (site+docs), robots.txt, sitemap.xml.

Multi-host www/docs/trust with correct self-canonicals and 17-URL sitemap.

About SOL + Security pages dense and institutionally credible.

Docs TechArticle schema and coherent internal linking.

Glossary

SEO

Traditional optimization for Google/Bing rankings: titles, metas, headings, crawlability, structured data.

GEO

Optimization for AI answer engines that synthesize and cite sources — entities, facts, llms.txt, AI crawler access.

AEO

Optimization for featured snippets and voice answers — FAQ/HowTo schema, question headings, concise extractable answers.
